Of diacetylene, Sho-Chow Woo and T. C. Chu—786
Of electrolytes, C. H. Cartwright—776
Of formaldehyde, E. S. Ebers and H. H. Nielsen—822
Of formaldehyde vapor, E. S. Ebers and H. H. Nielsen—84(L)
Of gadolinium ion in crystals, G. C. Nutting and F. H. Spedding—33
Of Grignard solutions, W. B. Plum—172
Hydrogen bond, R. M. Badger and S. H. Bauer—839
Hydrogen bond formation, effect of, A. M. Buswell, V. Deitz and W. H. Rodebush—84(L)
Of HCl in solutions, W. West and R. T. Edwards—14
Of hydrogen sulfide, P. C. Cross—370(L)
Of hydrogen sulfide, A. D. Sprague and H. H. Nielsen—85
Of H_2S in infrared, F. D. Carvin—159(L)
Hydroxyl group and hydrogen bonding, A. M. Buswell, V. Deitz and W. H. Rodebush—501
Infrared association band of a heavy alcohol, G. Bosschieter—992(L)
Of ketene, H. Gershinowitz and E. Bright Wilson, Jr.—500(L)
Levels of erbium sulfate octohydrate, F. H. Spedding—316
Of methyl acetylene, R. M. Badger and S. H. Bauer—599(L)
Of neodymium chloride hexahydrate, F. H. Spedding and H. F. Hamlin—429
Of neodymium, sulfate octohydrate, energy states, F. H. Spedding, H. F. Hamlin and G. C. Nutting—191
Of N_2O_5 and NO_3, E. J. Jones and O. R. Wulf—873
O—H band in acids, S. H. Bauer and R. M. Badger—852
Of polyatomic fluorides, C. R. Bailey, J. B. Hale and J. W. Thompson—274(L)
Of praseodymium sulfate octohydrate, F. H. Spedding, J. P. Howe and W. H. Keller—416
Of rare earth solids, F. H. Spedding—160(L)
Of samarium tungstate and samarium molybdate, S. Freed and E. L. Haenisch—26
Of substituted acetylenes and mustard oils, R. M. Badger—178
Of ytterbium and cerium salts, S. Freed and R. J. Mesirow—22
Accommodation coefficients
Of paraffin hydrocarbons, O. Beeck—268
Adsorption (see **Surface phenomena**)
Affinity
Amorphous state
Viscosity and rigidity of glucose glass, G. S. Parks and J. D. Reagh—364
Apparatus and methods
Analysis of isotopic mixtures, N. R. Trenner—382
Analyzer for secular equations and vibration frequencies, D. P. MacDougall and E. B. Wilson, Jr.—940
Concentration of N^{15}, H. C. Urey, J. R. Huffman, H. G. Thode and M. Fox—856
Effect of hydrogen peroxide on photographic image, M. W. Jones and J. M. Blair—835
Low temperature calorimeter, W. F. Giauque and C. J. Egan—45
Sensitized photographic emulsions, J. A. Leermakers—889
Sensitized photographic emulsions, J. A. Leermakers, B. H. Carroll, and C. J. Staud—878, 893
Separation of mixtures by centrifuging, J. W. Beams and L. B. Snoddy—993(L)
Ultrasonic velocities in gases at high pressures, A. H. Hodge—974
Atomic spectra
Absorption of ytterbium and cerium salts, S. Freed and R. J. Mesirow—22
Of erbium ion in crystals, F. H. Spedding—316
Of gadolinium ion in crystals, G. C. Nutting and F. H. Spedding—33
Of neodymium ion in crystals, F. H. Spedding and H. F. Hamlin—429
Of neodymium ion in crystals, F. H. Spedding, H. F. Hamlin and G. C. Nutting—191
Of praseodymium ion in crystals, F. H. Spedding, J. P. Howe and W. H. Keller—416
Of samarium ion in salts, S. Freed and E. L. Haenisch—26

Catalysis
Autoxidation of monolayers, G. Gee—801
Chemical reactions (see **Kinetics of reactions**)
Collision diameters
Between HgH and N_2, F. F. Rieke—831
Collision phenomena
Determination of heat capacities by, O. Beeck—268

Energy transfer in molecular systems, H. Gershinowitz—54
Halogens on tungsten, J. C. Hendricks, T. E. Phipps and M. J. Copley—868
Transfer of rotational energy, F. F. Rieke—831

Crystal structure
Of alloys in zinc and cadmium, J. A. A. Ketelaar—668(L)
Of antimony trioxide, M. J. Buerger and S. B. Hendricks—600(L)
Of caesium nitrate, C. Finbak and O. Hassel—460
Grain boundaries in iron, H. Morgan, S. Steckler and B. L. Miller—953
Oxide film on iron, H. R. Nelson—252
Of P_2O_6, P_4O_8, P_4O_{10} and As_4O_6, L. R. Maxwell, S. B. Hendricks and L. S. Deming—626
Of potassium metaborate, W. H. Zachariasen—919

Crystalline state
Energy levels of praseodymium sulfate octohydrate, F. H. Spedding, J. P. Howe and W. H. Keller—416
Energy states of neodymium chloride hexahydrate, F. H. Spedding and H. F. Hamlin—429
Energy states of neodymium sulfate, F. H. Spedding, H. F. Hamlin and G. C. Nutting—191
Fields in erbium sulfate, F. H. Spedding—316
Lattice energies and related properties, M. L. Huggins—143
Lattice energy of CO_2, H. Sponer and M. Bruch-Willstätter—745
Molecular rotations in disubstituted ethanes, A. H. White and S. O. Morgan—655
Spectra of gadolinium ion, G. C. Nutting and F. H. Spedding—33
Spectra of rare earth solids, F. H. Spedding—160(L)

Deuterium (see **Hydrogen and isotopes**)

Dielectric constants
Dipole-dipole coupling in dielectric media, J. H. Van Vleck—556
Effect of, on vibration frequencies, W. West and R. T. Edwards—14
Of isopropyl alcohol, J. D. Stranathan—828
Relation to rotation in solid state, C. P. Smyth and W. O. Baker—666(L)
Rotation in solid state, C. P. Smyth and W. O. Baker—666(L)
Translational fluctuation effect in gaseous dielectrics, J. H. Van Vleck—991(L)

Dipole moments
Effect of CS_2 as solvent, F. E. Hoecker—372(L)
Of gliadin, S. Arrhenius—63
Of isopropyl alcohol, J. D. Stranathan—828

Dispersion, rotary
Of alkyl azides, P. A. Levene and A. Rothen—985
Of carbinols and their chlorides, P. A. Levene and A. Rothen—980

Electrolytes
Absorption of light by, C. H. Cartwright—776
Diffusion constant of, A. R. Gordon—522

Electron diffraction
Analytic method of analysis, S. H. Bauer—368(L)
Grain boundaries in iron, R. Morgan, S. Steckler and B. L. Miller—953
Of long chain organic compounds, K. H. Storks and L. H. Germer—131
Of oxide film on iron, H. R. Nelson—252
Structure of P_2O_6, P_4O_8, P_4O_{10} and As_4O_6, L. R. Maxwell, S. B. Hendricks and L. S. Deming—626

Element 43
Properties of, C. Perrier and E. Segrè—712

Entropy (see **Thermodynamic properties**)

Errata
Absorption spectra of cyanic acid and isocyanates, Sho-Chow Woo and Ta-Kong Liu—499
Absorption system of cyanogen gas, Sho-Chow Woo and Ta-Kong Liu—499
Photochemical reactions in monolayers, J. S. Mitchell—83

Heat capacity (see **Thermodynamic properties**)

Hydrogen (see **Isotopes**)
Diffusion through carbonyl ion, C. B. Post and W. R. Ham—913
Structure of H_3 and H_3^+, J. Hirschfelder, H. Diamond and H. Eyring—695
Structure of H_3, H_3^+ and H_3^-, D. Stevenson and J. Hirschfelder—933

Isotopes
Abundance of oxygen isotopes, G. M. Murphy and P. F. Brandt—274(L)
Analysis by thermal conductivity, N. R. Trenner—382, 751
Analysis of, deuteromethanes and ethanes, W. S. Benedict, K. Morikawa, R. B. Barnes and H. S. Taylor—1
Chemical exchange methods for separation of lithium, T. I. Taylor, H. C. Urey—597(L)
Concentration of N^{15}, H. C. Urey, J. R. Huffman, H. G. Thode and M. Fox—856
Deutero compounds as indicators, E. W. R. Steacie and W. A. Alexander—372(L)
Double minimum problem of ammonias, F. T. Wall and G. Glockler—314
The isotope effect of N_2O, J. E. Rosenthal—465
Mercury sensitized reactions of methanes and hydrogen isotopes, K. Morikawa, W. S. Benedict and H. S. Taylor—212, 751
Potential function of H_2O, G. W. King—405, 413
Properties of benzene and benzene-d_6, R. C. Lord, Jr., J. E. Ahlberg and D. H. Andrews—649
Raman spectra of deuterobenzenes, A. Klit, A. Langseth—925(L)
Reactions between deuterium and hydrocarbons, N. R. Trenner, K. Morikawa and H. S. Taylor—203
Spectra of deuterium sulfide, A. H. Nielsen and H. H. Nielsen—277
Spectra of deuteroparaldehyde and paraldehyde, R. W. Wood—287
Surface tension of D_2O, G. Jones and W. A. Ray—505
Vibrations and isotopic molecules, O. Redlich and H. Tompa—529

Kinetics of reactions
Autoxidation of monolayers, G. Gee—801
Autoxidation of monolayers, G. Gee and E. K. Rideal—794
Between deuterium and hydrocarbons, N. R. Trenner, K. Morikawa and H. S. Taylor—203
Bimolecular association, L. S. Kassel—922
Bimolecular association reactions, G. E. Kimball—310
Calculation of activation energies, T. Jones and A. Sherman—375
Decomposition of alkyl nitrite, E. W. R. Steacie and S. Katz—125
Decomposition of ethane, H. Sachsse—199
Decomposition of ethane, E. W. R. Steacie and N. W. F. Phillips—275(L)
Decomposition of nitrous oxide, W. A. Noyes, Jr.—807
Deutero compounds as indicators for free radicals, E. W. R. Steacie and W. A. Alexander—372(L)
Energy transfer in molecular systems, H. Gershinowitz—54
Factors influencing rates in solution, R. A. Ogg, Jr., and O. K. Rice—140
In gaseous polymerizations, J. B. Harkness, G. B. Kistiakowsky and W. H. Mears—682
Mercury sensitized reactions of methanes and hydrogen isotopes, K. Morikawa, W. S. Benedict and H. S. Taylor—212
Nuclei in solid metal reactions, G. Derge—462
Oxidation of nitric oxide, G. M. Calhoun, R. H. Crist—301
Photochemical reactions in monolayers, J. S. Mitchell—83
Photochemical reduction with x-rays, G. L. Clark, W. S. Coe—97
Reaction mechanisms, A. E. Stearn, H. Eyring—113
Reactions between nitrogen dioxide, carbon monoxide and oxygen, G. M. Calhoun, R. M. Crist—301
Theory of association reactions, E. Wigner—720
Transfer of rotational energy, F. F. Rieke—831
Transitions of phosphorus at high temperatures and pressures, R. B. Jacobs—945

Light emission
From cavitated liquids, L. A. Chambers—290

Liquids
Fluidity and freezing point curves in solutions, R. H. Ewell—967
Partition function for liquid mercury, J. F. Kincaid and H. Eyring—587
Theory of, W. Altar—577
Theory of liquid structure, J. Hirschfelder, D. Stevenson and H. Eyring—896
Theory of viscosity of, R. H. Ewell, H. Eyring—726
Thermodynamics of, O. K. Rice—353

Magnetic properties
And the production of low temperatures, J. H. Van Vleck—320
Effect of dipole-dipole coupling, J. H. Van Vleck—320
Study of magnetic cooling experiments, M. H. Hebb and E. M. Purcell—338

Mechanics, quantum
Asymmetric collinear triatomic molecules, J. E. Rosenthal—465
Color of organic compounds, A. L. Sklar—669
Double minimum problem of ammonia, F. T. Wall, G. Glockler—314
Vibrations of deuteroethylenes, C. Manneback—989(L)
Energy of H_3 and H_3^+. J. Hirschfelder, H. Diamond and H. Eyring—695
Of erbium sulfate energy levels, F. H. Spedding—316
Free internal rotation of C_2H_6, J. B. Howard—451
Frequencies of triatomic free radicals and $C_2H_2D_2$ and $C_2H_2Cl_2$, Ta-You Wu—392
Harmonic vibration constants, O. Redlich, H. Tompa—529
Of H_3, H_3^+ and H_3^-, D. Stevenson and J. Hirschfelder—933
Interaction between rotation and oscillation, H. H. Nielsen—818
Of optical rotatory power, E. U. Condon, W. Altar and H. Eyring—753
Potential function of H_2O, G. W. King—405, 413
Rotation and vibration of triatomic molecules, A. Weinberg, C. Eckart—517
Of simple hydrides, J. R. Stehn—186
Structure of H_3, H_3^+ and H_3^-, D. Stevenson and J. Hirschfelder—933
Superconductivity in aromatic compounds, F. London—837(L)
Theory of association reactions, E. Wigner—720
Vibration-rotation levels of molecules, E. Bright Wilson, Jr.—617
Vibrations of C_2H_6, J. B. Howard—442

Mechanics, statistical (see **Kinetics of reactions**)
Calculation of equilibrium constants, T. Jones and A. Sherman—375
Of condensing systems, J. E. Mayer—67
Of condensing systems, J. E. Mayer, P. G. Ackermann—74
Theory of liquid structure, J. Hirschfelder, D. Stevenson, H. Eyring—896

Molecular films (see **Surface phenomena**)

Molecular spectra (see **Absorption spectra**)
Of acetic acid vapor, R. M. Badger, S. H. Bauer—605
Of benzene, G. B. Kistiakowsky, A. K. Solomon—609
Of carbon suboxide, R. C. Lord, Jr., N. Wright—642
Of cyanic acid and isocyanates, Sho-Chow Woo, Ta-Kong Liu—499
Of cyanogen, Sho-Chow Woo and Ta-Kong Liu—161
Of cyclopropane and ethylene oxide, L. G. Bonner—704
Of deuterium sulfide, A. H. Nielsen, H. H. Nielsen—277
Of deuteromethanes and ethanes, W. S. Benedict, K. Morikawa, R. B. Barnes, H. S. Taylor—1
Of diacetylene, Sho-Chow Woo and T. C. Chu—786
Force constants from L. G. Bonner—293
Of formaldehyde, E. S. Ebers, H. H. Nielsen—822
Of formaldehyde vapor, E. S. Ebers, H. H. Nielsen—84(L)

Of hydrogen sulfide, P. C. Cross—370(L)
Of H_2S in infrared, F. D. Carvin—159(L)
Of hydrogen sulfide, A. D. Sprague, H. H. Nielsen—85
Of HgH, F. F. Rieke—831
Of ketene, H. Gershinowitz, E. Bright Wilson, Jr.—500(L)
Of methyl acetylene, R. M. Badger, S. H. Bauer—599(L)
Of N_2O_5 and NO_3, E. J. Jones and O. R. Wulf—873
Of polyatomic fluorides, C. R. Bailey, J. B. Hale, J. W. Thompson—274(L)
Of substituted acetylenes and mustard oils, R. M. Badger—178

Molecular structure and constants (see **Molecular spectra** and **Absorption spectra**)
Of amino acids and amines, J. T. Edsall—225
Asymmetric collinear triatomic molecules, J. E. Rosenthal—465
Of carbon suboxide, R. C. Lord, Jr., and N. Wright—642
Constants of the C−C and C−O bonds, L. G. Bonner—293
Of cyanogen, Show-Chow Woo and Ta-Kong Liu—161, 499
Of cyclopropane and ethylene oxide, L. G. Bonner—704
Double minimum problem of ammonia, F. T. Wall and G. Glockler—314
Electronic levels of simple hydrides, J. R. Stehn—186
Of formaldehyde, E. S. Ebers, H. H. Nielsen—822
Free internal rotation of C_2H_6, J. B. Howard—451
Frequencies in ethylene molecules, Ta-You Wu—600(L)
Frequencies of triatomic free radicals and $C_2H_2D_2$ and $C_2H_2Cl_2$, Ta-You Wu—392
Harmonic vibration constants, O. Redlich, H. Tompa—529
Of hydrocarbons, G. Glockler, F. T. Wall—813
Of H_3, H_3^+ and H_3^-, D. Stevenson, J. Hirschfelder—933
Of HCl in solutions, W. West and R. T. Edwards—14
Of HCl, HBr, SO_2 and NH_3 in various solvents, W. West, P. Arthur—10
Of hydrogen sulfide, A. D. Sprague and H. H. Nielsen—85
Interaction between rotation and oscillation, H. H. Nielsen—818
Internuclear distance in Te_2, M. L. Huggins—201(L)
Of long chain organic compounds, K. H. Storks, L. H. Germer—131
Mechanical calculator of vibration frequencies, D. F. MacDougall, E. B. Wilson, Jr.—940
Of methanes and ethanes, W. S. Benedict, K. Morikawa, R. B. Barnes and H. S. Taylor—1
Of methyl acetylene, R. M. Badger and S. H. Bauer—599(L)
Modes of vibration of deuteroethylenes, C. Manneback—989(L)
Potential function of H_2O, G. W. King—405, 413
Rotation and vibration of triatomic molecules, A. Weinberg, C. Eckart—517
Secular equation of water type rotator, and H_2S, B. L. Crawford, Jr., and P. C. Cross—621
Of Si_2Cl_6 and Si_2H_6, F. Stitt and D. M. Yost—90
Superconductivity in aromatic compounds, F. London—837(L)
Valence angle in hydrogen sulfide, B. L. Crawford, Jr., and P. C. Cross—371(L)
Vibration-rotation levels of molecules, E. Bright Wilson, Jr.—617
Vibrations of C_2H_6, J. B. Howard—442

Optical properties
One-electron rotatory power, E. U. Condon, W. Altar, H. Eyring—753
Rotary dispersion of alkyl azides, P. A. Levene, A. Rothen—985
Rotary dispersion of carbinols and their chlorides, P. A. Levene, A. Rothen—980
Theory of optical rotatory power, J. G. Kirkwood—479

Phase rule
Diagram of water at high pressures, P. W. Bridgman—964

Photochemistry
Decomposition of nitrous oxide, W. A. Noyes, Jr.—807
Mercury sensitized reactions of methanes and hydrogen isotopes, K. Morikawa, W. S. Benedict, H. S. Taylor—212
Of photographic image, M. W. Jones, J. M. Blair—835
Primary processes in solution, G. K. Rollefson, W. F. Libby—569
Reduction with x-rays, G. L. Clark, W. S. Coe—97
Of sensitized photographic emulsions, J. A. Leermakers—889
Of sensitized photographic emulsions, J. A. Leermakers, B. H. Carroll, C. J. Staud—878, 893
Theory of photosynthesis, J. Franck, K. F. Herzfeld—237

Raman spectra
Of amino acids and amines, J. T. Edsall—225
Of amino acids and related compounds, J. T. Edsall—508
Of CH_3CF_3 and CCl_2CF_2, J. S. Hatcher and D. M. Yost—992(L)
Of CH_3OH, CH_3OD, and CH_2DOD, J. O. Halford, L. C. Anderson, G. H. Kissin—927
Detection of common ion effect, J. H. Hibben—710
Of deuterobenzene, A. Klit, A. Langseth—925(L)
Of deuteroparaldehyde and paraldehyde, R. W. Wood—287
Of *di-n*-butyl ether and ethyl adipate, F. F. Cleveland, M. J. Murray—752(L)
Of dioxane, R. C. Williamson—666(L)
Effect of polarization, J. H. Hibben—706
Of hydrogen sulfide, G. M. Murphy, J. E. Vance—667(L)
Low and high frequencies for water, J. H. Hibben—994(L)
Of metaborate ion, J. R. Nielsen, N. E. Ward—201(L)
Of Si_2Cl_6 and of Si_2H_6, F. Stitt, D. M. Yost—90
Of simple molecules in solution, W. West, P. Arthur—10
Of solid H_2S, S. C. Sirkar and J. Gupta—990(L)
Of water, I. R. Rao, P. Koteswaram—667(L)
Of water, aqueous solutions and ice, J. H. Hibben—166

Solutions
Absorption spectra of acids and alcohols, R. M. Badger, S. H. Bauer—839
Activity coefficient of copper sulfate solutions, F. E. W. Wetmore, A. R. Gordon—60
Detection of common ion effect by Raman spectra, J. H. Hibben—710
Diffusion of an electrolyte, A. R. Gordon—522
Factors influencing rates in, R. A. Ogg, Jr., and O. K. Rice—140
Fluidity and freezing point curve, R. H. Ewell—967
Ionization of di- and tricarboxylic acids, J. T. Edsall—508
Relaxation time and dipole moments of gliadin, S. Arrhenius—63
Spectra of acetic acid in various solvents, W. Gordy—284
Spectra of Grignard solutions, W. B. Plum—172
Thermodynamic treatment of, R. W. Goranson—107
Spectra, molecular (see **Molecular spectra**)
Surface phenomena
Autoxidation of monolayers, G. Gee—801
Autoxidation of monolayers, G. Gee, E. K. Rideal—794
Dyes on silver halide, J. A. Leermakers, B. H. Carroll, C. J. Staud—893
Edge energy and tension, W. D. Harkins—135
Effect of x-ray on oil drops, W. Stenstrom and I. Vigness—298
Energy exchange between surfaces and gases, O. Beeck—268
Halogen films on tungsten, J. C. Hendricks, T. E. Phipps, M. J. Copley—868
Oxide film on iron, H. R. Nelson—252
Surface tension of D_2O and D_2O-H_2O mixtures, G. Jones, W. A. Ray—505
Theory of surface tension of aqueous solutions, K. Ariyama—467
Viscosity of monomolecular films, R. J. Myers, W. D. Harkins—601(L)

Thermodynamic properties
Association equilibrium of acetic acid vapor, R. M. Badger, S. H. Bauer—605
Of benzene and benzene-d_6, R. C. Lord, Jr., J. E. Ahlberg, D. H. Andrews—649
Of benzene, methyl alcohol and glycerol, J. E. Ahlberg, E. R. Blanchard, W. O. Lundberg—539
Boiling points of organic compounds, A. H. W. Aten, Jr.—260, 598(L)
Calculation of, G. M. Murphy—637
Of carbon dioxide, W. F. Giauque, C. J. Egan—45
Dissociation pressure of barium chloride octamine under inert gas pressure, A. J. Perkins—180
Equilibrium constants of exchange reactions, G. M. Murphy—637
Equilibrium of 1,2-diiodobutane, butene-1 and iodine, J. E. Cline and G. B. Kistiakowsky—990(L)
Free energy of C_2, A. R. Gordon—350
Heat capacities of paraffins, O. Beeck—268
Of hydrocarbons, K. S. Pitzer—473, 752(L)
Of HCN from spectroscopic data, A. R. Gordon—30
Lattice energy of CO_2, H. Sponer, M. Bruch-Willstätter—745
Melting of mononitrophenols at high pressure, R. B. Dow, H. B. Hibshman—960
Of *n*-butane and isobutane, G. S. Parks, C. H. Shomate, W. D. Kennedy, B. L. Crawford, Jr.—359
Of normal hydrogen and parahydrogen, R. B. Scott, F. G. Brickwedde—736
Of paraffins, A. H. W. Aten, Jr.—264, 598
Phase diagram of water at high pressures, P. W. Bridgman—964
Phosphorus at high temperatures and pressures—R. B. Jacobs—945
Of $Sm_2(SO_4)_3 \cdot 8H_2O$ and $Nd_2(SO_4)_3 \cdot 8H_2O$ from 3 to 40° Kelvin, J. E. Ahlberg, E. R. Blanchard, W. O. Lundberg—552
Specific heats of air, N_2 and CO_2, J. C. Hubbard, A. H. Hodge—978
Transitions in condensed systems, O. K. Rice—492
Of two crystalline forms of phosphine and its gas, C. C. Stephenson, W. F. Giauque—149
Thermodynamics
Calculation of functions for molecules with restricted internal rotations, K. S. Pitzer—469
Deriving first partial derivatives, F. Lerman—792, 994(L)
Treatment of solutions using activity and related functions, R. W. Goranson—107
Vaporization of liquids, O. K. Rice—353

Ultrasonic radiation
Emission of light from liquids, L. A. Chambers—290
Specific heats of air, N_2 and CO_2, J. C. Hubbard, A. H. Hodge—978
Velocity in gases at high pressures, A. H. Hodge—974

Valence (see also **Mechanics, quantum**)
The hydrogen bond, R. M. Badger, S. H. Bauer—605, 839
The hydrogen bond, A. M. Buswell, V. Deitz, W. H. Rodebush—501
Hydrogen bonds, W. Gordy—202(L)
Hydrogen bonds, R. M. Badger, S. H. Bauer—369(L)
Polarity of chemical bonds, M. L. Huggins—527
Viscosity
Temperature, pressure and volume coefficients of fluids, R. H. Ewell—571
Vitreous state (see **Amorphous state**)

X-ray diffraction
From polyatomic liquids, W. C. Pierce—717
X-rays
Effect on spreading oil drops, W. Stenstrom and I. Vigness—298
